

Process Power Manager (PMS)

Ensure a reliable and stable energy supply by maintaining power, frequency and voltage.

ABB Process Power Manager is a software-based, power management solution that seamlessly integrates with ABB 800xA process and electrical control systems to ensure a reliable and stable electricity supply.

Based on more than 30 years of experience, Process Power Manager automates reactions to disturbances based on priority or criticality. Operators can monitor, manage and maintain functions and assets for power generation, distribution and supply.

Our solution helps you:

- Accelerate decision making
- Reduce unplanned downtime
- Improve operator efficiency
- Decrease CAPEX costs
